

Session Summary  
Viewer 095  
26 July 1988  
Start: 1015  
End: 1200

The prompt "1996/end product" cued the following information: An isolated site in a hilly area with winding roads. The ideas of concealment and secrecy. There were military personnel wearing black uniforms (AOL: PVO troops). who were clustered around a piece of equipment which was large, long, and narrow and has wheels and motion is associated with it.

The prompt "energy" evoked the following information: I access two types of energy: one was lines of energy, the other was dense, ball-shaped energy, constrained, manipulated, pressured, molded, contained and utilized. A conceptual sketch of the energy is on page three.

The prompts of "director's intent" evoked the following information: do-able, robust, and a feeling of lack of hesitancy, that from the present until a future date there are no anticipated glitches-smooth sailing ahead on the project. What is being made are big, long, (approx 20 ft) large 'things' that are carefully engineered, rugged and movable. Side and top down sketches are on page 6. (AOL: phased array antenna). Associated with the relationship between 'energy' and the 'thing' is the idea that the energy is a very fundamental principle. ✓

Throughout the session, I still had the feeling that I was viewing two separate things/projects. ✓

PROJECT SUN STREAK (U)

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

-----  
PROJECT NUMBER: 8809

SESSION NUMBER: 6

DATE OF SESSION: 26 JUL 88

DATE OF REPORT: 29 JUL 88

START: 1015

END: 1200

METHODOLOGY: CRV

VIEWER IDENTIFIER: 095  
-----

SG1A 1. (S/NF/SK) MISSION: Describe the activities associated with the target 

2. (S/NF/SK) VIEWER TASKING: 095 was directed to reacquire the site and to begin the session in Stage 4 with the monitor-introduced cue of [1996/end product]. 095 was also directed to concentrate on the previously perceived idea of "energy."

3. (S/NF/SK) COMMENTS: Site contact was adequate, but both monitor and viewer experienced difficulty in attempting to 'tie together' many of the percepts. [Monitor suspects that there may exist some confusion with regard to the implied (psychic) task in the mind of the viewer].

4. (S/NF/SK) EVALUATION: [3]
